This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

The Reasoned Action Approach Applied to Health Behavior: Role of Past Behavior and Tests of Some  
Key Moderators Using Meta-Analytic Structural Equation Modeling

†These authors contributed equally to the manuscript

### **Acknowledgements and Conflict of Interest Statement**

Martin S. Hagger's contribution was supported by a Finland Distinguished Professor (FiDiPro) award (Dnro 1801/31/2105) from TEKES, the Finnish funding agency for innovation, and a Kennedy Y. H. Wong Distinguished Visiting Professorship at Hong Kong Baptist University. The funders had no role in the study design, the collection, analysis and interpretation of data, writing the article, and in the decision to submit for publication. Martin S. Hagger and Juho Polet contributed equally to this manuscript so it should be considered jointly first-authored. Martin S. Hagger, Juho Polet, and Taru Lintunen declare they have no conflict of interest.
