This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Title

The becoming of methadone in Kenya: How an intervention's implementation constitutes recovery potential

Running head

Methadone's becoming

Author

Tim Rhodes

Author role

Professor of Public Health Sociology

Author institution

University of New South Wales, Sydney, Australia; London School of Hygiene and Tropical Medicine, UK.

Acknowledgements

Data for these analyses were generated by a research project funded by the National Institutes of Health entitled "Implementing Integrated Methadone and HIV Care in Kenya". Tim Rhodes was Co-Investigator to this NIH funded project with Andy Guise (London School of Hygiene and Tropical Medicine and University of California at San Diego), Principal Investigator Steffanie Strathdee (University of California at San Diego), and Co-Investigator Fred Owiti (University of Nairobi and Chiromo Lane Medical Centre, Nairobi, Kenya). Data were generated through interviews undertaken by Emmy Kageha (University of Nairobi), James Ndimbii (Kenyan AIDS Non-Government Organisations Consortium (KANCO) and Andy Guise. Fieldwork was supported through close collaboration with community outreach projects in Nairobi, especially the Nairobi Outreach Services Eastlands Team.
