This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Manuscript Number: SSM-D-14-03205

Manuscript Title: Beyond metrics? Utilizing 'soft intelligence' for healthcare quality and safety

Order of Authors:

Graham P. Martin ¹

Lorna McKee ²

Mary Dixon-Woods ¹

¹ University of Leicester

² Aberdeen University

Corresponding author: Graham Martin, gpm7@le.ac.uk, University of Leicester, SAPPHIRE Group, Department of Health Sciences, 22-28 Princess Road West, Leicester LE1 6TP, United Kingdom

Acknowledgment/s: We acknowledge with gratitude our colleagues on the wider study, especially Janet Willars, who undertook most of the interviews used in this article. We would also like to thank the study's participants, and three anonymous peer reviewers. We thank the United Kingdom Department of Health Policy Research Programme (grant number 0770017) for funding this research programme of which this study was a part. Mary Dixon-Woods' contribution was supported by a Wellcome Trust Senior Investigator award (grant number WT097899MA). Graham Martin's contribution to writing up the paper was supported by the National Institute for Health Research (NIHR) Collaboration for Leadership in Applied Health Research and Care East Midlands. The views and opinions expressed herein are those of the authors, and do not necessarily reflect those of the Policy Research Programme, the NHS, the NIHR, or the Department of Health.
