#### ACKNOWLEDGEMENTS

This work is supported by the Modeling Obesity through Simulation (MOTS) grant, US National Institutes of Health (NIH-NICHD) R01-HD-061978-0109. Furthermore, this work was done as part of the Envision Project, supported by the National Collaborative on Childhood Obesity Research, which coordinates childhood obesity research across the National Institutes of Health (NIH), Centers for Disease Control and Prevention (CDC), Department of Agriculture, and the Robert Wood Johnson Foundation (RWJF). This work was supported in part by grants from RWJF (grant numbers 260639, 61468 and 66284), CDC (U48/DP00064-00S1 and 1U48DP001946), including the Nutrition and Obesity Policy, Research and Evaluation Network, and the Office of Behavioral and Social Sciences Research of NIH. This work is solely the responsibility of the authors and does not represent official views of the Centers for Disease Control and Prevention or any of the other funders.

The authors would like to give special thanks for the contributions of Amy Auchincloss (Drexel University) and Lara Dugas (Loyola University Chicago) to this project.
