Acknowledgements

We thank our respondents for their acceptance to participate in this study, their warm welcome and their trust in us. We are equally grateful to sociotherapists for their willingness to assist in selecting our respondents and mediating our relationship with them. We thank Julia Challinor for her editorial advices, the anonymous Social Science & Medicine reviewers for their constructive comments, and Nuffic (Netherlands Universities Foundation for International Cooperation) for funding the first author for his PhD research, which informed this article.
