This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Research Highlights:

- Develops new associations between relational geographies and the developing field of therapeutic landscapes research.
- Provides an empirical illustration of the theoretical notion of assemblage from the broad area of medical/health geographies.
- Argues for more attention to be paid to embodiment and inhabitation within assemblage research.
- Introduces an unusual but rich geographical setting, the diffusion of the Roman-Irish bath, as a case study of a therapeutic assemblage.
