This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

***Highlights (for review)**

- Using high-frequency quote data, we show Bitcoin is investible at the retail level.
- We examine transactions costs and liquidity of major Bitcoin exchanges.
- Trading induces additional volatility in Bitcoin.
- We show intraday patterns consistent with retail participants.
