This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

### Highlights

- We estimate the impact of a pollution reduction law in a middle-income country.
- We study the South Korea's Clean Air Act that focused on Seoul and its surroundings.
- The DID estimates suggest that the Act successfully reduced air pollutants.
- The Act's impact on infant mortality was not statistically significant.
