This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

## **The Development of Non-Cognitive Skills in Adolescence**

*Peter Hoeschler, Simone Balestra, Uschi Backes-Gellner*

### **Highlights**

- In contrast to previous studies, we find non-cognitive skills to be malleable
- For adolescents, Grit and three of the Big Five increase on average
- However, changes are quite heterogeneous across individuals
- Changes are robust to reasonable measurement error
