Manipulation of single-winner large elections by vote pairing

Hayrullah Dindar (1)

Jean Lainé (2)

Abstract

Manipulation of indirect elections by vote pairing occurs when a group of voters in different electoral bodies secures a jointly preferred winner by performing pairwise exchanges of votes. We show that for elections involving a large enough number of districts, each with a large enough size, no reasonable constitution is immune to vote-pairing.

Keywords : Indirect elections - Vote Pairing -Group Manipulation
