This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

ACCEPTED MANUSCRIPT

*Highlights (for review)

HIGHLIGHTS

- We document negative skew in small open economies (SOEs) having high spreads
- The skew is small or positive in developing SOEs having low spreads and in developed SOEs
- A sovereign default model with capital generates the observed negative skew
