This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights:

- The study analyses time and frequency varying comovements in gold futures trading
- Wavelet analysis is used to examine the comovements
- Gold futures and the spot market interaction is stronger at different time scales
- COMEX and LBMA are the world's leading gold markets at different time scales
