This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Highlights**

- We use implied volatility indices and examine causality dynamics
- We examine dynamics between gold and the Chinese and Indian stock markets (2011-2016)
- We uncover some interesting predictability patterns that differ along the spectrum.
- We report a feedback effect between gold and China's market in high frequencies
- Gold predicts India's market in low frequencies
- We account for structural breaks and reveal more nuanced dynamics
