This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

## Highlights

- A model of bilateral trade with endogenous private information is proposed.
- The seller is initially uninformed about value of asset but can learn it over time.
- Learning value means choosing which attribute of asset to inspect each period.
- The buyer does not observe inspection outcomes and may not observe inspection plan.
- We study the equilibrium in this environment.
