

Accepted Manuscript

An approximate dynamic programming method for the multi-period technician scheduling problem with experience-based service times and stochastic customers

Xi Chen, Mike Hewitt, Barrett W. Thomas

PII: S0925-5273(17)30343-2

DOI: [10.1016/j.ijpe.2017.10.028](https://doi.org/10.1016/j.ijpe.2017.10.028)

Reference: PROECO 6860

To appear in: *International Journal of Production Economics*

Received Date: 10 March 2017

Revised Date: 15 September 2017

Accepted Date: 28 October 2017

Please cite this article as: Chen, X., Hewitt, M., Thomas, B.W., An approximate dynamic programming method for the multi-period technician scheduling problem with experience-based service times and stochastic customers, *International Journal of Production Economics* (2017), doi: 10.1016/j.ijpe.2017.10.028.

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

An Approximate Dynamic Programming Method for
the Multi-Period Technician Scheduling Problem with
Experience-based Service Times and Stochastic
Customers
