This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Economic activity and momentum profits: further evidence

Paulo Maio

Dennis Philip¹

This version: January 2018

(Forthcoming at the Journal of Banking and Finance)

¹Maio, paulo.maio@hanken.fi, Hanken School of Economics (Department of Finance and Statistics); Philip, dennis.philip@durham.ac.uk, Durham University Business School. We thank an anonymous referee, Geert Bekaert (the editor), Ruslan Tuneshev, and participants at the Arne Ryde Workshop, University of Glasgow, Hanken School of Economics, SOFIE “Large-Scale Factor Models in Finance Conference” in Lugano, SWFA Meeting (Dallas), and the Eastern Finance Association Meeting (Pittsburgh) for helpful comments. We are grateful to Kenneth French, Amit Goyal, Sydney Ludvigson, Robert Shiller, Robert Stambaugh, and Lu Zhang for providing stock return and other financial data. Previous drafts circulated with the titles “Macro factors and equity risk premia”, “Macro factors and the cross-section of stock returns”, and “Economic activity and the Intertemporal CAPM”. Any remaining errors are our own.
