This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- Every 10 local manufacturing jobs created 3.4 additional jobs in the tradable sector.
- When categorized by skills, High Tech Manufacturing created 7 additional jobs.
- Low Tech manufacturing did not have a significant effect on job creation in the non-tradable sector.
- The multiplier effect is higher for inland provinces.
- Non-tradable sector jobs were created in industries that employed more local residents relative to migrants.
