This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- To study effects of China's non-employment based health insurance on entrepreneurship
- Insurance increases self-employment rate in urban China by at least 8.73 percentage points
- Effects are large for the less educated, unhealthy, middle-aged, and senior workers
- We find no effect for the more educated, healthy, and young workers
