This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

# The Amenity Cost of Road Noise†

Kathrine von Graevenitz\*

April 13, 2018

---

†I would like to thank Joshua Abbott, Michael Hanemann, Nicolai Kuminoff, V. Kerry Smith, Richard Spady and Bo Jellesmark Thorsen for their advice and helpful discussions. I would also like to thank Wolfram Schlenker, Toke Panduro, Benjamin Johannes Lutz, and the seminar participants at Camp Resources XX, University of Copenhagen, Danish Economic Councils, University of Mannheim, Centre for European Economic Research, and University of Heidelberg for comments and suggestions. Helpful suggestions and comments from the editor and two anonymous referees also improved the paper substantially. I gratefully acknowledge financial support from the Center for Environmental Economics and Sustainability Policy at Arizona State University. Finally, I would like to thank the Danish Economic Councils for providing access to the data used for this analysis and Statistics Denmark for support. The opinions and conclusions in the paper are those of the author and do not necessarily represent the views of the Danish Economic Councils. This paper is a revised version of a chapter in the author's PhD thesis at University of Copenhagen.
