September 17, 2017

JEL codes: Q23, Q18, Q15

Key words: deforestation, agricultural intensification, climate change, cattle, pasture, Brazilian Amazon

Acknowledgments: This research was funded by the National Science Foundation (SES-0752936). Thank you to our survey team: Rafael Alves da Silva, Anderson Boina, Alessandro de Oliveira, Laize Sampaio Chagas e Silva, Maria Eliza Cota e Souza, Luzia Correa Dias, Liege Gehm, Juliana Gragnani, Julia Faro, Tnia Cloilde R. Luz, Ivone Holz Seidel, and Priscilla Souza for their tireless efforts to complete the household surveys as well as the local residents of Ouro Preto do Oeste for their participation. Thank you to Katrina Mullan and Erin Sills for their oversight of the survey; Dan Harris, Suzanne McArdle, Brian Klitch, and Patrick Wright for their collection of the GIS data; Dar Roberts for processing the remote sensing data and to Charlie MacIntyre for field assistance. Previous rounds of data collection were supported by the National Science Foundation, SES-0452852 in 2005, SES-0076549 in 2000, and the National Security Education Program, the Organization of American States, the Institute for the Study of World Politics, and the McClure Fund Foundation in 1996. A majority, if not all, of the data used in the analysis can be found at the archive of social science data for research and instruction at the Inter-university Consortium for Political and Social Research of the University of Michigan. All location identifiers have been removed.
