Running Title: Does water scarcity shift the electricity generation mix?

*Eyer: jeyer@usc.edu. Wichman: wichman@rff.org. We are grateful to Maureen Cropper, Karen Palmer, Roberton C. Williams III, Edson Severnini, Paul Ferraro, Ujjayant Chakravorty, Timothy Hamilton, Peter Maniloff, Patrick Walsh, and two anonymous referees for helpful discussions and comments. This paper also benefited from suggestions from seminar and conference participants at Resources for the Future, EPA's National Center for Environmental Economics, the 2016 American Economics Association annual meeting, the 2015 Association of Environmental and Resource Economists meeting, the 2015 Agricultural and Applied Economics Association meeting, and the 2014 Southern Economics Association meeting. Brandon Cunningham provided exceptional research assistance. Previous versions of this paper were circulated using the title, "The effect of water supply shocks on the electricity generation mix: Implications for climate change."
