Please cite this article as: Dajun Lin, Randall Lutter, Christopher J. Ruhm, Cognitive Performance and Labour Market Outcomes, *Labour Economics* (2017), doi: 10.1016/j.labeco.2017.12.008

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

#### ACCEPTED MANUSCRIPT

#### Highlights

- Cognitive performance is associated with future labour market outcomes at all ages.
- The estimated return to cognitive performance rises with age.
- Associations with incomes reflect associations with wage rates and hours worked.
- Relative returns to cognitive performance vary with race, ethnicity and sex.
