

Accepted Manuscript

Distance correlation detecting Lyapunov instabilities, noise-induced escape times and mixing

Carlos F.O. Mendes, Marcus W. Beims

PII: S0378-4371(18)30977-4
DOI: <https://doi.org/10.1016/j.physa.2018.08.028>
Reference: PHYSA 19914

To appear in: *Physica A*

Received date: 17 April 2018

Please cite this article as: Distance correlation detecting Lyapunov instabilities, noise-induced escape times and mixing, *Physica A* (2018), <https://doi.org/10.1016/j.physa.2018.08.028>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- Distance correlation measuring nonlinearities in dynamical systems.
- Describing noise-induced escape times using the distance correlation.
- Lyapunov exponents and correlation decay.
