Information measures and topological-band insulator transitions in
2D-Dirac materials under external circularly polarized lasers, and static
electric and magnetic fields

E. Romera, M. Calixto, J.C. Bolívar

PII: S0378-4371(18)30920-8
DOI: <https://doi.org/10.1016/j.physa.2018.07.048>
Reference: PHYSA 19873

To appear in: *Physica A*

Received date : 4 June 2018

Revised date : 24 July 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- Topological phase transitions.
- Information measure characterizations.
- 2D Dirac materials under laser, electric and magnetic fields.
