This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

***Highlights (for review)**

ACCEPTED MANUSCRIPT

1. The outer synchronization between complex networks is investigated.

2. The node dynamics are different and the parameters are uncertain.

3. The delayed coupling is considered in the complex network.

4. The synchronization can be realized for all topology structures.

5. The uncertain parameters can be identified when the synchronization is realized.
