This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

It is easy to calculate the free energy with the aid of the spectral density (SD).

The approximation of SD by polynomials leads to nonphysical results.

The n-vicinity approximation of SD provides good results for the 3D Ising model.
