To appear in: *Physica A*

Received date : 17 March 2017
Revised date : 8 May 2018

Please cite this article as: H. Wang, J. Wang, M. Small, Knowledge transmission model with differing initial transmission and retransmission process, *Physica A* (2018), <https://doi.org/10.1016/j.physa.2018.05.041>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

1. Knowledge transmission process is divided into an initial transmission and retransmission periods.
2. Increase the parameters of initial transmission process can accelerate the velocity of knowledge transmission effectively.
3. Increase the parameters of retransmission process improves the rate of knowledge transmission efficiently.
