On the learning control effects in the cancer-immune system competition

Léon Masurel, Carlo Bianca, Annie Lemarchand

PII: S0378-4371(18)30505-3
DOI: <https://doi.org/10.1016/j.physa.2018.04.077>
Reference: PHYSA 19509

To appear in: *Physica A*

Received date: 12 February 2018

Revised date: 12 April 2018

Please cite this article as: L. Masurel, C. Bianca, A. Lemarchand, On the learning control effects in the cancer-immune system competition, *Physica A* (2018), <https://doi.org/10.1016/j.physa.2018.04.077>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

- The model reproduces the 3 E's: Elimination, Equilibrium, and Escape of cancer
- Thermalizing cell activity mimics both learning and memory loss due to cell death
- Insufficient activity thermalization may lead to cancer proliferation
- A large rate of cancer cell production may lead to cancer control
