This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- We provides sufficient conditions that are very close to the necessary ones for the permanence.
- We estimate the polynomial convergence rate of the transition probability to an invariant probability measure.
- Our result gives a precise characterization of the support of the invariant measure.
