This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

## Highlights

- The relationship between economic growth and carbon dioxide emissions.
- This study investigate the relationship between CO<sub>2</sub> emissions and economic growth.
- CO<sub>2</sub> emissions from gaseous/liquid/solid fuel consumption.
- CO<sub>2</sub> emissions from solid fuel consumption has the highest influence on the GDP.
