## **Accepted Manuscript**

Multi-institutional authorship in genetics and high-energy physics

Mu-Hsuan Huang, Yu-Wei Chang

 PII:
 S0378-4371(18)30411-4

 DOI:
 https://doi.org/10.1016/j.physa.2018.03.091

 Reference:
 PHYSA 19425

 To appear in:
 *Physica A* 

 Received date :
 23 August 2017

 Revised date :
 8 February 2018

Please cite this article as: M.-H. Huang, Y.-W. Chang, Multi-institutional authorship in genetics and high-energy physics, *Physica A* (2018), https://doi.org/10.1016/j.physa.2018.03.091

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

- Increasing trends are observed in the annual percentages of multi-institutional authors.
- Most multi-institutional authors in genetics are affiliated with two or more universities
- Most multi-institutional authors in high-energy physics are affiliated with at least one university and one research institution.
- The academic impact of articles by multi-institutional authors is greater than that of other articles in high-energy physics.
