

## Accepted Manuscript

Dynamics of a long platoon of cooperative adaptive cruise control vehicles

L.C. Davis

PII: S0378-4371(18)30323-6  
DOI: <https://doi.org/10.1016/j.physa.2018.03.015>  
Reference: PHYSA 19349

To appear in: *Physica A*

Received date: 12 May 2017  
Revised date: 26 September 2017

Please cite this article as: L.C. Davis, Dynamics of a long platoon of cooperative adaptive cruise control vehicles, *Physica A* (2018), <https://doi.org/10.1016/j.physa.2018.03.015>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- Alternate formulation of longitudinal control law for long CACC platoons
- Velocity plateau found for upstream vehicles with lead vehicle velocity feedback
- Simulations demonstrate the effectiveness of lead vehicle position and velocity feedback
- Analysis of discrete lead vehicle transmission failures and communication delays
