

## Accepted Manuscript

A novel evolutionary algorithm on communities detection in signed networks

Xiaoyu Zhu, Yinghong Ma, Zhiyuan Liu

PII: S0378-4371(18)31055-0  
DOI: <https://doi.org/10.1016/j.physa.2018.08.112>  
Reference: PHYSYA 19998

To appear in: *Physica A*

Received date: 2 November 2017  
Revised date: 18 March 2018

Please cite this article as: A novel evolutionary algorithm on communities detection in signed networks, *Physica A* (2018), <https://doi.org/10.1016/j.physa.2018.08.112>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

## Highlights

- 1, a novel evolution algorithm to detect communities by reveal the local information is presented.
- 2, the optimal solution of object function on community structure in signed networks corresponds to the minimum conflicts.
- 3, the evolving mechanism for the novel evolution algorithm is to adjust node's community by neighbors' effect.
- 4, results of the novel evolution algorithm converges to steady state faster than some other algorithms.
- 5, the effective of the novel algorithm is verified by comparative experiments on both synthetic and real world networks.
