This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

ACCEPTED MANUSCRIPT

Highlights of our work include...

- Multiple stable states in evolutionary prisoner's dilemma
- Low and high cooperative frequency states differ in structures
- Steady state cooperative frequencies show hysteresis as reward R is swept
- Closed pack cluster algorithm takes system to high cooperative states
