Exploring the influence of social activity on scientific career

Zonglin Xie, Zheng Xie, Jianping Li, Qian Yang

PII: S0378-4371(18)30190-0
DOI: <https://doi.org/10.1016/j.physa.2018.02.103>
Reference: PHYSA 19223

To appear in: *Physica A*

Received date: 18 July 2017
Revised date: 3 January 2018

Please cite this article as: Z. Xie, Z. Xie, J. Li, Q. Yang, Exploring the influence of social activity on scientific career, *Physica A* (2018), <https://doi.org/10.1016/j.physa.2018.02.103>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- We put forward a method to recognize different collaboration patterns.
- We find stronger correlation between three indexes of authors.
- We put forward a method to recognize the intersection of two distributions.
- We explore the problem from the view of distribution rather than merely expected value.
