This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

Transport of Brownian motors in two-dimensional surfaces .
Influence of the biharmonic parameter on the transport properties.
Influence of anisotropy upon the transport properties using deflection angle.
The substrate shape crucially affects the occurrence of the anomalous transport
