This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

***Highlights (for review)**

ACCEPTED MANUSCRIPT

We explore the energy cost of the information loss.
We use the concept of entanglement temperature to obtain a lower bound for the energy.
We study the energy cost in the case of two dimensional quantum walk.
