## **Accepted Manuscript**

A machine learning approach for predicting the relationship between energy resources and economic development

Dušan Cogoljević, Meysam Alizamir, Ivan Piljan, Tanja Piljan, Katarina Prljić, Stefan Zimonjić

To appear in: *Physica A* 

Received date : 14 October 2017 Revised date : 6 December 2017

Please cite this article as: D. Cogoljević, M. Alizamir, I. Piljan, T. Piljan, K. Prljić, S. Zimonjić, A machine learning approach for predicting the relationship between energy resources and economic development, *Physica A* (2017), https://doi.org/10.1016/j.physa.2017.12.082

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

## Highlights

- In this investigation was analyzed the economic development prediction.
- Machine learning approach to predict economic development.
- Machine learning approach can be utilized in applications of economic development forecasting.
