This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

## HIGHLIGHTS

The asymptotic formula of average distance for tetrahedron networks are obtained.

The average geodesic distance of the Sierpinski tetrahedron is described as an integral.

The finite patterns for integrals of geodesic distance are observed.
