

## Accepted Manuscript

Emergence of the small-world architecture in neural networks by activity dependent growth

F.M. Gafarov

PII: S0378-4371(16)30284-9

DOI: <http://dx.doi.org/10.1016/j.physa.2016.06.016>

Reference: PHYSA 17209

To appear in: *Physica A*

Received date: 19 October 2015

Revised date: 11 April 2016

Please cite this article as: F.M. Gafarov, Emergence of the small-world architecture in neural networks by activity dependent growth, *Physica A* (2016), <http://dx.doi.org/10.1016/j.physa.2016.06.016>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

1. Activity-dependent neural network growth
2. Growth in neural networks leads to the formation of a small-world network
3. Time dependent neural network connectivity
4. Node degree distribution
