Link prediction based on local information considering preferential attachment

Shan Zeng

PII: S0378-4371(15)00862-6

DOI: <http://dx.doi.org/10.1016/j.physa.2015.10.016>

Reference: PHYSA 16498

To appear in: *Physica A*

Received date: 24 February 2015

Revised date: 25 May 2015

Please cite this article as: S. Zeng, Link prediction based on local information considering preferential attachment, *Physica A* (2015), <http://dx.doi.org/10.1016/j.physa.2015.10.016>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights:

1. A new index is presented to estimate the likelihood of the existence of links.
2. The index is compared with five well-known indices on six real networks.
3. The index is competitive with LP and Katz, and more accurate than CN and PA.
