Neville R Norman , Ph. D., University of Melbourne, Victoria

Highlights for Review

- We use a number of variables to capture the banking sector depth (BSD).
- We investigate the linkages between BSD, trade openness, and economic growth.
- We utilize the data ASEAN regional forum countries between 1961 and 2012.
- Our findings show that there is a long-run equilibrium relationship between these variables.
- We also expose a number of causal relationships among these variables.
