This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Landing a job, sinking a career? The trade-off between occupational downgrading and quick reemployment according to unemployed jobseekers' career stage and job prospects

Helen Buchs^{1*}, Emily Murphy², Marlis Buchmann¹

¹University of Zurich

²University of Oxford, SKOPE

Keywords: unemployment, search and matching, occupational status mobility, labor demand, occupational labor market

Highlights:

- Involuntary occupational downgrading at reemployment after unemployment
- Trade-off between quality and speed of reemployment in an occupational labor market
- Impact of relative availability of best fit vacancies (job prospects) on trade-off
- Importance of job prospects for job search subject to career stage
- Joint impact of composition of labor demand and career stage on trade-off

Funding: This paper was funded by the Swiss Secretariat for Economic Affairs as part of the project 'Labor Market Mismatch and Unemployment Duration'.

Acknowledgements: The authors would like to thank the anonymous reviewers for their insightful comments and helpful suggestions. An earlier version of this paper was presented at the RC28 in Bern 2016, and we would like to thank participants for their valuable comments. The authors are grateful to Debra Hevenstone for her collaboration on the project 'Labor Market Mismatch and Unemployment Duration'.
