This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

ACCEPTED MANUSCRIPT

Highlights:

- Flow shop learning effect scheduling is addressed with release date consideration.
- Definition of preemption is presented for the learning effect scheduling model.
- A branch and bound algorithm is proposed with an efficient branching rule.
- Asymptotic optimality is proven for a class of SPTA-based heuristics.
