This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- We take into account the strategic weight manipulation in multiple attribute decision making
- We reveal the conditions to manipulate a strategic attribute weight
- We analyze the performance of MADM in defending against the strategic weight manipulation
- Simulation experiments are used to justify the validity of our models
