This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

Dissatisfaction with current care provision was reported by commissioners, managers and midwives

Within a system that did not otherwise support this, *Pregnancy Circles* enabled midwives to provide antenatal continuity of carer and build relationships with the women in their care

Midwives in this setting experienced group care as a safe and fulfilling way to provide care
