This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- Over one-third of the fathers were highly involved in pregnancy and childbirth.
- Fathers' involvement was correlated with informational support and their attitudes.
- Informational support was the only factor influencing fathers' high involvement.
- Improving informational support for fathers is a key to encourage their involvement.
