This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights:

- Emotional responses to an unintended pregnancy are varied and context-dependent
- Unintended pregnancy can heighten vulnerability and stress among some women
- Economic insecurity, violence, and HIV contribute to negative antenatal experiences
- Social support can help mitigate pregnancy-related stress
- Relationship conflict is common and compromises women's social support structures
