**Abstract**

In 2015, the International Confederation of Midwives launched the Midwifery Services Framework: a new evidence-based tool to guide countries through the process of improving their sexual, reproductive, maternal and newborn health services through strengthening and developing the midwifery workforce. The Midwifery Services Framework is aligned with key global architecture for sexual, reproductive, maternal and newborn health and human resources for health, and with the recommendations of the 2014 Lancet Series on Midwifery. This second in a series of three papers describes the process of implementing the Midwifery Services Framework: the preparatory work,
