This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

ACCEPTED MANUSCRIPT

Two new approaches for a two-stage hybrid flowshop problem with a single batch processing machine under waiting time constraint

Tsui-Ping Chung^{*, a}, Heng Sun^a, and Ching-Jong Liao^b ^aCollege of mechanical science and engineering, Jilin University, Changchun, China ^bDepartment of Industrial Management, National Taiwan University of Science and Technology, Taipei, Taiwan

Revised version

November 2016
